

Can the Dafron Series 5000 be upgraded to 10 digit dialing?

Answer: The Series 5000 telephone intercom system has been discontinued for more than 8 years, the last of the 10 digit dialing modules originally stocked when cellular numbers were implemented are sold out. Unfortunately its time to upgrade to a new system, feel free to contact any of our branches for pricing.

Should your complex be larger than 50 units please phone Mark Watt on 082 442 4023 for a great alternative system or visit www.clickon.co.za.
